Jaipur

X Class (CBSE)(2017-18)

MPS International School,
Jaipur

Skills

- Flutter development
- C++ Programming
- python
- Django (basics)
- SQL

Languages

- Hindi
- English
- French(school level)

Projects:

1) baatchit project :-

It is a cross platform app where user can chat with other users in their contacts and can send voice,video,text messages and can also share files and can reply to those messages and update their status and edit their profile

1) Utaren project

It was a project I build in a team during my training and internship programme. It was on music auditions where users can register, practice through videos, practice on lyrics and can record their voice and save it to the database.

2) lekhak project:-

Developed a cross-platform blog application using Flutter, enabling users to create, upload, and manage blogs seamlessly. The app features functionalities for liking, commenting, and searching for blogs, along with a follow system. I have used firebase for authentication and data storage.

3) voicechat project

It is a flutter based mobile app where user can chat with AI to get answers of their questions and it also supports voice.it uses Google Gemini api

5) Notes project

It is a django based web app where user can create and upload notes and edit them and can attach a particular emoticon with it and can also search for notes.

Certificates and extracurriculars:

- 1) training and internship in mobile application with flutter
- 2) python programming fundamentals with Infosys springboard
- 3) badges in mobile application from Android developers site
- 4) participation in technovation conference for paper submission
- 5) one day long workshop in robotics and Arduino UNO
- 6) student partner for internshala
